HELICOPTER

~ Higgsfield

STEP 1: TAKE YOUR PHOTO

STEP 2: CREATE THE AI IMAGE

Use Seedream 5

PROMPT USED

A large black cover is draped over the entire building, completely hiding it from view. The cover is held in place by cables that stretch upward into the sky, connecting to a helicopter hovering above. The helicopter is suspending the whole structure mid-reveal, cables taut, the black fabric hugging every curve of the building beneath it.

STEP 3: ANIMATE

Use Kling 3.0

A helicopter flies out of frame to the right, carrying a large black cover with it. The cover is attached to the helicopter by cables and is being pulled away, slowly revealing the building beneath as it goes. The fabric peels back smoothly as the helicopter moves, the cables staying taut throughout the motion. The helicopter and cover exit the frame completely to the right, leaving the building fully revealed

Start Frame.

End Frame

STEP 4: Get creative
