

AI Model + Claude + Obsidian Workflow

Complete Automation Pipeline: \$3K+/month Revenue System

SYSTEM OVERVIEW

PHASE 1: MODEL LOCK (One-Time Setup)

Step 1.1: Choose Your AI Model Platform

- **Option A:** Midjourney with `/describe` to lock parameters
- **Option B:** Runway Gen-3 with seed preservation
- **Option C:** ComfyUI + Stable Diffusion with fixed checkpoints
- **Option D:** Custom API (Claude vision + image generation service)

Step 1.2: Lock Face & Body

SEED: 42857 (Fixed)

PROMPTS TO TEST:

"[Model Name], brown hair, studio lighting, luxury aesthetic"

"[Model Name], same pose, different outfit, same lighting"

"[Model Name], 90-degree turn, same face structure, luxury"

GOAL: Every generation uses the same face/body/proportions

Step 1.3: Create Obsidian Database Structure

```
/Mudworld/
├── ModelLock/
│   ├── SeedParameters.md (seed: 42857, parameters locked)
│   ├── SuccessfulPrompts/ (archive of all winning prompts)
│   └── FailedPrompts/ (what NOT to use)
├── ContentCalendar/
│   ├── July2025.md
│   └── August2025.md
├── PromptLibrary/
└── Fashion/
```

```
|   |─ Lifestyle/
|   |─ Editorial/
|─ RevenueTracking/
|   |─ MonthlyMetrics.md
```

PHASE 2: CLAUDE AUTOMATION (Prompt Generation)

Step 2.1: Set Up Claude API Integration

```
// Basic API call structure
const response = await fetch('https://api.anthropic.com/v1/messages', {
  method: 'POST',
  headers: {
    'Content-Type': 'application/json',
    'x-api-key': process.env.CLAUDE_API_KEY
  },
  body: JSON.stringify({
    model: 'claude-sonnet-4-6',
    max_tokens: 500,
    system: `You are a professional AI photography prompt engineer specialized in
luxury fashion and editorial content. Generate specific, actionable prompts
that work with consistent AI models. Keep prompts under 100 words.`,
    messages: [
      {
        role: 'user',
        content: 'Generate a luxury fashion editorial prompt for a consistent mod
      }
    ]
  })
});
```

Step 2.2: Prompt Generation Template

Claude writes different prompts based on:

- Content type (portrait, fashion, lifestyle)
- Aesthetic (luxury, minimalist, cyberpunk)
- Current trends (what's trending on TikTok/Instagram)
- Obsidian history (pull from successful archive)

Example Claude-Generated Prompt:

"Professional luxury fashion editorial, studio setting, soft golden hour lighting, minimalist aesthetic, high-end silk garment, model in contemplative pose, sharp focus on fabric detail, shallow depth of field, magazine-quality photography, color graded in cool tones with warm accent lighting, shot on 85mm equivalent"

Step 2.3: Captions & Scripts

Claude also generates:

- **Instagram caption** (hashtags, call-to-action)
 - **TikTok hook** (first 3 seconds text)
 - **YouTube Shorts script** (30-second narrative)
 - **NFT description** (for Mudworld drops)
-

PHASE 3: OBSIDIAN KNOWLEDGE BASE (Memory Brain)

Step 3.1: Every Success Gets Stored

Prompt: Luxury Fashion Editorial - July 24

Seed: 42857

Prompt: "Professional luxury fashion editorial, studio setting..."

AI Model: Midjourney

Date: 2025-07-24

Platform: Instagram + TikTok

Revenue: \$340 (sales + sponsorship)

Engagement: 45K impressions, 12% CTR

Why This Worked:

- Specific lighting description
- Fashion-forward aesthetic
- Consistent with model lock

Content Generated:

- 4 Instagram posts (variations)
- 2 TikTok versions
- 1 YouTube Short
- 3 Print-on-Demand designs

Next Time:

Pull this exact workflow and change: [aesthetic/theme only]

Step 3.2: Content Calendar (Automated Planning)

```
## July 2025 Content Calendar

| Date | Type | Theme | Prompt Source | Status | Revenue |
|-----|-----|-----|-----|-----|-----|
| 7/24 | Fashion | Luxury | Claude Gen | Published | $340 |
| 7/25 | Portrait | Minimalist | Obsidian Archive | Scheduled | Pending |
| 7/26 | Lifestyle | Dreamy | Claude Gen | Queued | Pending |
| 7/27 | Editorial | Cyberpunk | Claude Gen | Draft | Pending |

**Total Scheduled Revenue**: $1,240 (4 posts × $310 avg)
```

Step 3.3: Pull Workflow Template

When you need to create new content, don't start from zero:

- 1. Open Obsidian
- 2. Search: "Luxury Fashion" (gets 47 previous successful prompts)
- 3. Pick top performer
- 4. Ask Claude: "Refresh this with new trends from last week"
- 5. Claude regenerates with new specifics
- 6. Save + Publish + Track

PHASE 4: CONTENT GENERATION PIPELINE (Automation)

Step 4.1: Workflow Sequence

```
TRIGGER → Model Generation → Claude Output → Publishing → Revenue Tracking

TRIGGER OPTIONS:
• Manual button click
• Scheduled (daily at 9 AM)
• Automated (when trending topic appears)
• Batch (generate 7 posts at once)
```

Step 4.2: Single Post Flow (15 minutes)

1. [Claude] Generate prompt (2 min)
Input: content_type + theme
Output: Detailed AI prompt
2. [AI Model] Render image (3-5 min)
Input: Locked seed + generated prompt
Output: Consistent model in new aesthetic
3. [Claude] Write copy (1 min)
Input: Generated image + platform
Output: Instagram caption + TikTok hook + YouTube script
4. [You] Publish (2 min)
Platforms: Instagram → TikTok → YouTube Shorts → Pinterest
5. [Obsidian] Log & Track (1 min)
Save prompt, image, copy, date, platforms used
6. [Monitor] Revenue (ongoing)
Track: Direct sales + Ad revenue + Sponsorships

Step 4.3: Batch Generation (Process 7 Posts = 1 hour)

BATCH SETUP:

- Monday 9 AM: Generate 7 prompts
- Claude loops: 7 different themes
- AI renders: All 7 images (parallel)
- Claude: All 7 captions + scripts
- Obsidian: All 7 logged + scheduled
- Publishing: Queued across week (1/day)

REVENUE PROJECTION:

7 posts × \$300-400 avg = \$2,100-2,800 revenue potential

PHASE 5: MONETIZATION STREAMS

Revenue Channel 1: Direct Sales (Print + Digital)

Model → AI Image → Print-on-Demand (Merch)

Price: \$25-60 per item

Volume: 8-15 sales/day from social reach

Monthly: \$6,000-27,000 (varies)

INTEGRATION: Post image → Automated link to Mudworld store

Revenue Channel 2: NFT Drops (Mudworld)

Best 4 posts/month → Limited NFT edition

Price: \$50-200 per NFT

Volume: 20-50 sales per drop

Monthly: \$1,000-10,000

INTEGRATION: Obsidian tags top performers → Auto-mint to blockchain

Revenue Channel 3: Sponsorships & Brand Deals

Instagram/TikTok: \$500-2,000 per sponsored post

YouTube Shorts: \$100-1,000 per 100K views

Monthly: \$2,000-8,000 (with 45K+ daily impressions)

INTEGRATION: Track posts hitting 100K+ reach in Obsidian

Revenue Channel 4: SaaS (Creator Factory)

Sell THIS workflow as subscription (\$49-99/month)

Or: White-label for photographers/models

Monthly: \$2,000-5,000 (from 20-100 subscribers)

Revenue Channel 5: Content Licensing

License images to brands/publications

Per license: \$100-500

Monthly: \$500-3,000

Total Monthly Target: \$3,000-5,000+ (conservative)

PHASE 6: OBSIDIAN AUTOMATION RULES

Auto-Rules to Set Up

Rule 1: Tag High Performers

```
IF engagement > 50K impressions
→ Tag: "viral"
→ Add to: "Premium Prompts" vault
→ Notify: Obsidian reminder to create NFT
```

Rule 2: Revenue Threshold Alert

```
IF post revenue > $500
→ Tag: "money-maker"
→ Clone prompt (5 variations)
→ Schedule 5 follow-ups
```

Rule 3: Content Calendar Auto-Population

```
DAILY:
1. Check trending hashtags (API)
2. Claude generates prompt based on trends
3. Auto-schedule for 3 days out
4. Pre-generate captions in Obsidian
```

Rule 4: Quarterly Prompt Analysis

```
MONTHLY:
→ Average engagement per prompt type
→ Which themes generate highest revenue
→ Which aesthetics resonate most
→ Update Claude system prompt based on winners
```

EXECUTION CHECKLIST

Week 1: Setup

- Lock AI model with seed parameter
- Create Obsidian vault structure
- Set up Claude API with auth
- Test one complete workflow manually

- Publish first post

Week 2-4: Manual Testing

- Generate 15 posts manually
- Test all revenue channels
- Refine Claude prompts based on results
- Build Obsidian archive (15 successful prompts)
- Target: \$600-1,000 revenue

Month 2: Partial Automation

- Automate prompt generation (daily)
- Batch generation (1x weekly)
- Obsidian auto-logging
- Revenue tracking dashboard
- Target: \$1,500-2,500 revenue

Month 3: Full Automation

- Scheduled posting (automated)
- Claude auto-generates captions
- Obsidian rules engine active
- NFT drops automated (Mudworld)
- Target: \$3,000+ revenue

TECHNICAL INTEGRATIONS

Zapier/Make Workflow

TRIGGER: Manual (button) or Scheduled (daily)

↓

Step 1: Claude API → Generate prompt

↓

Step 2: AI Model API → Render image (webhook)

↓
Step 3: Claude API → Generate captions
↓
Step 4: Instagram API → Post image + caption
↓
Step 5: TikTok API → Post 15-sec version
↓
Step 6: YouTube API → Post as Short
↓
Step 7: Obsidian API → Log prompt + image + metadata
↓
Step 8: Google Sheets → Log revenue (daily)

Direct Integration (Node.js)

```
// Pseudocode
async function generateAndPublish() {
  // 1. Generate prompt
  const prompt = await claude.generatePrompt(theme);

  // 2. Render image
  const image = await aiModel.render(prompt, seed42857);

  // 3. Generate captions
  const captions = await claude.generateCaptions(image);

  // 4. Publish to all platforms
  await instagram.post(image, captions.instagram);
  await tiktok.post(image, captions.tiktok);
  await youtube.post(image, captions.youtube);

  // 5. Log to Obsidian
  await obsidian.log({
    prompt,
    image,
    captions,
    platforms: ['instagram', 'tiktok', 'youtube'],
    date: new Date(),
  });

  // 6. Track revenue
  await sheets.log({
    post_id: image.id,
    date: new Date(),
    expected_revenue: calculateEstimate(captions.engagement),
  });
}
```

}

SCALING BEYOND \$3K/MONTH

Tier 2: Multiple Models (\$6K+)

- Variant A: Luxury aesthetic (current setup)
- Variant B: Minimalist aesthetic (new model)
- Variant C: Cyberpunk aesthetic (another model)

3 models × \$3K each = \$9K/month

Tier 3: Talent Licensing (\$10K+)

License your model + prompts to:

- Fashion brands (lookbooks)
- E-commerce sites (product photography)
- Marketing agencies (content production)

Licensing revenue: \$1K-5K/month per brand

Tier 4: SaaS Product (\$15K+)

Creator Factory + This workflow = Hybrid tool

Sell to photographers/content creators:

- \$49/month tier (basic)
- \$99/month tier (advanced)
- \$299/month tier (enterprise)

100 customers × \$99 = \$9,900/month

SUCCESS METRICS TO TRACK

WEEKLY:

- ✓ Posts published: ____ (target: 7)
- ✓ Total impressions: ____ (target: 315K)
- ✓ Revenue: \$____ (target: \$700-1,000)
- ✓ Prompts in archive: ____ (target: +7)

MONTHLY:

- ✓ Content library size: ____ (target: +30 prompts)
- ✓ Monthly revenue: \$____ (target: \$3,000+)
- ✓ Obsidian knowledge base: ____ (fully indexed)
- ✓ Average engagement per post: ____% (track trend)

QUARTERLY:

- ✓ Most valuable prompt type: ____
- ✓ Highest revenue aesthetic: ____
- ✓ Best platform: ____ (Instagram/TikTok/YouTube)
- ✓ Revenue per work hour: \$____

GO LIVE TODAY

1. **Lock your model** (30 min)
2. **Create Obsidian vault** (20 min)
3. **Set up Claude API key** (5 min)
4. **Generate first prompt** (2 min)
5. **Post first content** (5 min)
6. **Start tracking revenue** (10 min)

Total setup time: 72 minutes

Then:

- Day 2-7: Manual workflow (7 posts, \$700-1,000 revenue)
- Week 2-4: Partial automation (15 posts, \$1,500-2,500)
- Month 2-3: Full automation (\$3,000+ on repeat)

REMEMBER

This isn't about the AI model—it's about:

1. **Consistency** (locked model = recognizable brand)
2. **Velocity** (Claude + automation = daily content)

3. **Memory** (Obsidian = never starting from zero)

4. **Scale** (workflow = recurring revenue)

One model. One second brain. Infinite content. \$3K+ on repeat.
